Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- ***Anyone, anywhere*** can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files ***always print correctly*** on any printing device.
- PDF files always display ***exactly*** as created, regardless of fonts, software, and operating systems. Fonts, and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

when choosing fish there are various important aspects to look for. The first is the smell of the fish. It should not smell overpowering or fishy. The second is the appearance of the fish. The eyes should be clear and bright, not cloudy or sunken. The gills should be red and moist, not brown or slimy. The skin should be shiny and not dull. The flesh should be firm and not soft or mushy. The fish should also have a fresh, clean taste.

After selecting a whole, clean, large piece of fish or seafood, it is important to prepare it properly before cooking. The first step is to remove the scales. This can be done with a scaler or a knife. The next step is to remove the head and tail. This can be done with a knife or a pair of scissors. The fish should then be gutted. This can be done with a knife or a pair of scissors. The fish should then be rinsed thoroughly under cold running water. The fish should then be patted dry with paper towels. The fish should then be seasoned with salt and pepper. The fish should then be cooked.

CANDIDATE	PRO	CON
WILLIAM PRYOR:	Called Roe v Wade the "worst abomination in the history of constitutional law"	May be too moderate for Republican Party's go-to base
STEVEN COLLOTON	Stance on workers' rights legislation and corporate personhood could increase Trump Organization profits up to 12%	Appears some of his rulings may have been plagiarized from *The Fountainhead*
NEIL GORSUCH:	Reliably conservative textualist with favorable rulings in corporate cases	Overly attached to some potentially troublesome amendments
CRYSLAK ALPHA.	1,289,900 years of experience defending the use of torture on the Inter Void Strategic Rights Council	Ability to consume convolutions of nearly Reforms may give him convoluted influence on rulings where he diverges from administration
ANTONIN SCALIA JR	Possesses strong opinions and formidable verbal skills identical to those of his father the deceased conservative Supreme Court justice whose seat we need to replace	Does not exist
DIANE SKYES:	Robust history of upholding criminal convictions voter ID laws and religious groups rights	Sadly there exists a tragic mindless condition stemming from the ovaries a form of raving madness that overtakes the female body from time to time and to the regrettable misfortune of all there exists no tonic capable of remedying such fitfulness of temperament
JUDGE DOOM	Pro-business, pro-police pro-death penalty	Convicted or may have dropped a piano on Teddy Vietnut
AMUL THAPAR:	Impressive law enforcement background strict constructionist	Only being considered in order to make list of candidates appear more substantial
THE DIRECTOR:	Possesses infallible judgement and complete command of all universe s knowledge	Would be unable to maintain full responsibilities once administration implements Directive 315 of the Theistic Protocol

"Antigonish"

As I was walking up the stair
I met a man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

When I came home last night at three
The man was waiting there for me
But when I looked around the hall
I couldn't see him there at all!
Go away, go away, don't you come back any more!
Go away, go away, and please don't slam the door

Last night I saw upon the stair
A little man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

Humperdinck First things first. To the death!

Westley No. To the pain.

Humperdinck [stops, stricken back] I don't think I'm quite familiar with that phrase.

Westley I'll explain...and I'll use small words so that you'll be sure to understand, you warthog-faced buffoon.

Humperdinck That may be the first time in my life a man has dared insult me.

Westley It won't be the last. "To the pain" means the first thing you lose will be your feet, below the ankles, then your hands at the wrists. Next, your nose.

Humperdinck [exasperated] And then my tongue, I suppose. I killed you too quickly the last time, a mistake I don't mean to duplicate tonight.

Westley I wasn't finished. The next thing you lose will be your left eye, followed by your *right*—

Humperdinck [losing his patience] And then my ears. I understand! Let's get on with it—

Westley WRONG! Your ears you keep, and I'll tell you why. So that every shriek of every child at seeing your hideousness will be yours to cherish. Every babe that weeps at your approach, every woman who cries out "Dear God, what is that thing?" will echo in your perfect ears. That is what "to the pain" means. It means I leave you in anguish, wallowing in freakish misery forever.

Humperdinck [cautious] I think you're bluffing.

Westley It's possible. Pig. I might be bluffing. It's conceivable you miserable, worthless mass that I'm only lying here because I lack the strength to stand. Then again...perhaps I have the strength after all. [slowly rises and points his sword directly at the prince] Drop. Your. Sword. [Humperdinck immediately drops his sword] Have a seat. [Humperdinck obeys]

DIAMOND IN THE ROUGH

He was over 50 when we married, a bachelor without strings. He got a widow with a bright, difficult collegiate daughter, a brighter, even more difficult adolescent son, a ramshackle house, a distant mother in-law, and even a cantankerous cat. For three years, the winds of chance have blown often and hard, but wherever they took us he has been there at my side. I have been promoted twice, the kids are on track, our new home is snug and cozy, my mother is happily settled nearby. And as for the cat, she sleeps on his feet, the most contented of us all.

A Note About Organ Meat

Organ meat is a relatively healthy but very important part of the raw diet. It seems to be the thing that is most often left out or is not fed on a regular basis. It is important to get the proper amount of organ meat regularly into your dogs' diet.

Before we were grinding our own organ mixture we would get kidney and beef or chicken liver from the grocery or the butcher. We would also buy chicken gizzards which were fairly easy to find. These containers of chicken gizzards often contain both heart and gizzards but the heart included is in very small amounts. **While chicken gizzards will do in a pinch or for variety, they are not a sufficient source of organ meat in the long term. It is important to feed heart, kidney & liver.**

It is typically more difficult to find things like kidney or beef heart, but they should not be left out of the diet. You may have more luck finding these sorts of things in ethnic grocery stores. Many a great meal I have discovered in an ethnic grocery store!

Eventually we found a company that sold an entire product line of raw foods for dogs and for a short time we were buying their ground organ mix that came in 10 pound buckets. But the prices became prohibitive and we were paying close to a $1.80 per pound for this mixture for 8 large dogs.

We learned that if we bought our own organ meat in bulk and did the grinding ourselves we would save well over a $1.00 a pound! So that is what we do: we get all of our meat from a purveyor and we grind our own organ mixture. Minus the labor we spend approximately 56 cents a pound. We grind because it is the most convenient way to feed to a large group like ours.

However, the price of a pre-ground mixture may be fine for those of you with 1-3 dogs and if you have access to this type of pre-ground mix it is far more convenient than constantly hunting down sources for organ meat.

Bravo! Raw Food For Dogs makes a ground organ meat mix and they have several retail stores & distributors throughout the USA. Visit their site for a distributor near you:

http://www.bravonwdiet.com/bravoretailers.html

Oma's Pride is another that makes an organ mixture with retail stores & distributors across the U.S.:

http://www.omaspride.com/Retailers.htm

Some of you may have no trouble at all finding sources for organ meat depending on the stores in your area. And grinding may be unnecessary if you don't mind doing a little shopping or dicing.

We do have a meat grinder and we only use it for two things – our organ meat mixture below and grinding chicken leg quarters which we use to wean our puppies.

Here is the makeup of our ground organ meat mixture:

60% beef heart
30% liver (pork or beef)
10% kidney (pork or beef)

The dogs should get ¼ cup every other day or ¼ cups every day. We and I will supp le mixture an the 2 days we land the burger/veggie meal and 1/2 cup on 2 other days during the week. So basically 3-3.5 cups a week is appropriate.

If all you can find in the short term is liver then feed 1 oz a day or 2 oz every other day. But in the long term the nutrition provided by the heart & kidney will be required.

Yahoo Groups has many raw feeding lists that are targeted to specific areas of the country. It is very likely that there is one for your area where people share meat sources, places to shop and even get together to buy in bulk so all can save some money. It is worth checking out! I will be happy to help you find if there is one for your location.

QUEEN PALM CARE GUIDE

Easy as 1-2-3

Queen Palms are some of the most beautiful and most popular palms grown here in the desert. If given proper care, they will always be as green and full as when purchased.

1. WATERING

By far, water is the most important ingredient for the well being of Queen Palms here in the desert. Queen Palms are tropical type palms, native to much wetter areas of the world. They can handle the extremes of our desert temperatures, but do need more water than native palms. For most palms that don't appear healthy, think of properly applied water combined with nutrient deficiencies is usually the cause. A good rule of thumb is that it's practically impossible to over water a Queen Palm, especially during the intense heat of summer months!

When applying water to your is better? As a Queen Palm matures, it's roots spread wider but not much deeper than 18 to 24 inches. So make sure that as your tree grows to apply the water under every year. A good rule of thumb for this is to water an area at least 5 to 6 times as wide as the trunk diameter.

How often to water depends on many variables including current temperatures, soil conditions and recent rainfall (or lack of). To keep a good, happy level of moisture for Queen Palms, basic watering guidelines are as follows:

Season / Temp Range	Watering (per week)
Summer - Above 100°	4 or more times per week
Fall / 85° to 100°	2 to 3 times per week
Winter - Below 85°	1 to 2 times per week
Spring / 85° to 100°	2 to 3 times per week

NOTE: These are guidelines. Adjustments are made to benefit. Example: Apply after each time don't have soil dry out per week. Some study and may need more frequent applications for applied water.

2. FERTILIZING

Keeping Queen palms healthy has never been this easy!

Don't fall for expensive injections or spikes that many use to fertilize. We've taken the guesswork out of feeding Queen Palms. Our Super Palm Juice® has all of the major & micro nutrients to keep palms green & healthy in an easy to use liquid format that reaches the roots FAST!

Super Palm Juice is great for all varieties of palms and is an absolute must for Queen Palms!

This entire area needs to stay moist for it to the main root of the palm.

3. TRIMMING

Only remove fronds that hang downward (below horizontal). So why cut fronds about 2 "5" from trunk, using a cut that is parallel to the trunk. During Summer months it's common to get some brown tips. It's ok to just trim off the brown and leave the green portion of the frond. Trimming is usually only necessary once or twice a year.

Congratulations on your purchase of a Rare, hand-built, Seymour Duncan bass guitar pickup! Installing this pickup in your bass is rocket science. And, if you're already handy with tools, it'll be a snap for you—and fun too! But if you have no experience handling real-live soldering irons, you'd be well advised to take your new pickup and your trusty bass to a qualified guitar tech.

The basic steps for installation include:

1 Remove the strings from you bass.
2 Remove the control plate and flip it over.
3 Desolder the original pickup's wires from the controls and make sure to remember where they were connected.
4 Remove the pickup from the pickup cavity.
5 If there was foam attached to the bottom of your original pickup pull it off and re-use it with your new Seymour Duncan bass pickup.
6. Put your Seymour Duncan bass pickup into the pickup cavity.
7 Trim the wires from the Seymour Duncan bass pickup, and then solder them into place (see Fig. 2).
8. Replace the control plate.
9 Re-string your bass and adjust the pickups so they are set about 1/8" from the strings when they are pressed down at the highest fret on the neck.

Hello World!

PRESSURE CYCLING SYSTEM

"HPV" – HIGH PRESSURE VAPOR LEAVING COMPRESSOR.

"HPL" – VAPOR IS COOLED DOWN BY CONDENSER AIR FLOW AND LEAVES AS HIGH PRESSURE LIQUID

"LPL" – ORIFICE METERS THE LIQUID R-12, INTO EVAPORATOR, REDUCING ITS PRESSURE AND WARM BLOWER AIR ACROSS EVAPORATOR CORE CAUSES BOILING OFF OF LIQUID INTO VAPOR.

"LPV" – LEAVES EVAPORATOR AS LOW PRESSURE VAPOR AND RETURNS WITH THE SMALL AMOUNT OF

"oil" – LOW PRESSURE LIQUID THAT DIDN'T BOIL OFF COMPLETELY BACK TO THE COMPRESSOR TO BE COMPRESSED AGAIN

eyes. Any liquid Refrigerant 12 which may accidentally escape is approximately 21°F (-6°C) below zero. If liquid Refrigerant 12 should touch the eyes, serious damage could result. Always wear goggles to protect the eyes when opening refrigerant connections. If Refrigerant 12 liquid should strike the eye:

a. Call a doctor or eye specialist immediately and obtain treatment as soon as possible.

b. DO NOT RUB THE EYE. Splash the affected area with quantities of cold water to gradually get the temperature above the freezing point.

c. The use of an antiseptic oil is helpful in providing a protective film over the eyeball to reduce the possibility of infection. Should liquid Refrigerant-12 come into contact with the skin, the injury should be treated the same as skin which has been frostbitten or frozen.

All Refrigerant 12 drums are shipped with a heavy metal screw cap. The purpose of the cap is to protect the valve

REFRIGERANT — 12 PRESSURE — TEMPERATURE RELATIONSHIP

The table below indicates the pressure of Refrigerant — 12 at various temperatures. For instance a drum of Refrigerant at a temperature of 80°F (26.6°C) will have a pressure of 84.1 PSI (579.9 kPa). If it is heated to 125°F (51.6°C), the pressure will increase to 167.5 PSI (1154.9 kPa). It also can be used conversely to determine the temperature at which Refrigerant — 12 boils under various pressures. For example, at a pressure of 30.1 PSI (207.5 kPa), Refrigerant — 12 boils at 32°F (0°C).

Orchids Care

Remember that orchids are used to sitting high on trees, with their roots long and free. Give them plenty of clean air, moisture (water from the sky and just the right light (under the canopies

When Flowering
Feeding
Feed with 20-20-20 fertilizer at a rate of 1 gram per liter every other watering.

If the plant seems to lose its luster you can always mist it with the same rate of fertilizer (only the plant, not the flowers). Misting can be done several times a day as long as you make sure there is no run-off and no standing water on the leaves.

Watering
Do not let the soil dry out; evenly moist is the ideal state.

Because conditions vary in each household or office, lift the plant daily to see if it is too heavy. The pot should feel heavy versus the rest of the plant

Water should not be dripping from the bottom, nor should it be sitting in an enclosed container holding water. The holes in the bottom of the pot are there for exactly that reason—good drainage

When Flowering is Finished
Pruning
When all flowers have dropped off, cut the stem 2 inches (5 centimeters) above the leaves. This will give the plant the chance to flower from the base and from the stem. If you cut the stem much higher, the new spike will be thinner and will not be able to support as many flowers. If you cut the stem much shorter, it will not flower from that stem, only from the base. This way, you will give the plant the opportunity to have multiple spikes as the years go by

Feeding
The feeding in this period is stronger. Use the same fertilizer at the same strength but with every watering. If you lose roots (they turn dull and lose the green tip), mist daily for two weeks

Repotting
This is also the time to repot the plant if needed. Remember that it is normal for the roots to hang all over the place; they are looking for moisture, air and light

If repotting, use bark in the mixture, and make it porous. Your garden center can supply orchid mixes.

The only reason to repot an orchid is to freshen the orchid mix, not the size of the pot. This is a plant that needs a much smaller container than the plant itself. If you place it in a lot of soil in a huge pot, the roots are never going to find their way to the light and will rot on the way

When Will It Flower Again?
It will flower naturally if you have cooler nights once you cut off the spikes and the plant has had the opportunity to put on one or two new leaves. Move the plant outside in the evening or to a cooler room for the night. If your home/office is the same temperature 24 hours a day or better at night to save energy, you might as well buy a new plant (which is fine with us). Ideal day temperature is 77 to 86 degrees F and at night 65 to 72 degrees F

Looking for More Information?
If you require more information or as we hope, get serious with your orchid habit, a good place to look is www.orchidweb.org

Faxing with Ooma

With the proper equipment, it is possible to send and receive faxes. There are several configuration options, allowing you to select the setup that will be best for you. Before you begin, please keep in mind that you will need to have access to a working fax machine, and possibly a phone splitter in order to use this feature. Once you have all of the necessary tools, check out the guides below for your desired configuration.

1. Using your phone and fax machine on the same line
2. Using your fax machine on a dedicated line
3. How to send a fax
4. How to receive a fax
    1. If you've set up your fax machine on a dedicated line
    2. If you have your phone and fax machine set up on the same line
5. I followed the directions but my faxes still aren't working. What can I do?
6. Background Information: Voice over IP (VoIP) and Fax Machines

Using your phone and fax machine on the same line

To use your home phone and fax machine on the same line, you'll connect both devices to the PHONE port on the back of your Ooma device. This setup is great if you don't use your fax machine often, or if you usually send faxes, but don't receive them. To get started, you will need the following equipment:

- A standard phone splitter
- Your fax machine
- Two phone cords

SCIENCE

The Scientist Behind Our

Dr. Joe McCord, Chief Science Officer at LifeVantage Corporation, was always interested in how things work. When he was 10 or 12 years old, he got a chemistry set for Christmas—and the rest is history!

He planned to become a chemical engineer but in his junior year of college, got interested in biochemistry. A professor encouraged and directed him to graduate studies in biochemistry and while at Duke University as a 21-year-old graduate student, he "stumbled on to something very, very important that directed the rest of his career."

He remembers April 3, 1985—going home, sitting down and realizing that 10 years of observations could fit into a logical rational framework. He "wrote" the moment. The next day he designed an experiment to test it. Regarding that moment in the lab when he made his world renowned discovery he said, "Science doesn't usually work from a scientist saying, I have a grandiose idea" and the scientist set off about to prove it. Rather it's years of

We will see that cheating and failing to vote violate the second condition. The utilitarian test can therefore be misleading if it alone is applied, particularly to decision making at the level of the individual.

Utilitarianism for Policy Decisions

Utilitarianism tends to be a more reliable guidance of the right choice when applied to *policy* decisions that govern a large number of people, as when a government passes a law or a large corporation adopts a regulation.

If a government wishes to enact a mandatory voting law (as is done in Australia, Belgium, Singapore, Uruguay and elsewhere), the utilitarian test is helpful. A rule that says "Don't vote if it is inconvenient," clearly doesn't maximize utility because it leads to the collapse of democracy. Even the opposite rule, "Vote if you are eligible," seems suboptimal because it asks the seriously ill to drag themselves to the polls. Democracy will not suffer if a few sick persons stay home. Perhaps an optimal voting rule would arrange eligible voters on a scale according to the inconvenience of voting and make exceptions for those at the high end. The cut point can be located so as to maximize overall utility.

A utilitarian analysis is not a reliable way to resolve Jennifer's job dilemma, since it is an individual decision rather than a policy decision. Yet it may help her MBA program design its job placement policy. Some business schools (including the Tepper School) deny their career services to students who renege on an employment contract. The justification is that a strict policy creates a good reputation for the school, which attracts more recruiters, which in turn makes everyone better off on the average—even if some people like Jennifer pay a price. This is a classic utilitarian justification.

Utilitarianism and Justice

Even when utilitarianism is restricted to policy making, it may not always provide a just solution. It is true that there is already a strong principle of justice in utilitarianism simply because everyone's utility is given equal weight in the calculation. One cannot (arbitrarily) give greater weight to members of the upper class or of a certain race, for example. Furthermore, utilitarian solutions show at least some preference for equality due to the principle of decreasing marginal utility. As one acquires more resources, utility rises at a decreasing rate. A fixed amount of resources may therefore bring more utility when they are distributed widely rather than concentrated in a few persons. This introduces a bias in favor of more equal distributions.[8]

[8] The utilitarian bias toward equality is limited, as shown by a mathematical analysis. Let the utility that results from giving Q units of some resource to person i be aQ_i^p. The exponent p is less than 1 when there are decreasing marginal returns. The coefficient a_i indicates the person's ability to use the resources; a_i is presumably larger for persons who are intelligent, well positioned in society, or advantaged in other ways. The goal is to maximize $\Sigma a_i Q_i^p$ subject to $\Sigma Q_i = A$, where Q_i is the amount of resource allocated person i and A is the total amount of resource available. If $p = 1$ (i.e. marginal utility is constant), then the most advantaged person gets all of the resources. Otherwise the problem can be solved by associating Lagrange

"Preparen el Camino del Señor enderecen sus senderos"
Marcos 1:3

LA TARDANZA DE DIOS

En tiempos de grandes dificultades los hombres se meten en discusiones: "¿Dónde está Dios?" ¿Por que no viene a Dios a salvarnos ahora?" Y nosotros, gente de fe respondemos más o menos como lo hizo Pedro en la segunda lectura de hoy la "tardanza" de la segunda venida del Señor no es ningún tipo de castigo ni un fallo en la promesa divina sino un signo del amor de la paciencia de Dios. Dios esta dando a todos y a cada uno la oportunidad de hacer el arrepentimiento Dios no hace lo que cada mas difícil. Mas bien, nos da tiempo para los justos evalúen que regresen a su paso después del gran error en Babilonia. Dios quiere personalmente los gentiles, preparándoles una "calzada recta" para ellos a través del desierto. No somos a nosotros interpretados en los que esperaban poder ver al Evangelio de Dios distante de ellos y que finalmente se dieron cuenta de que el Señor también caminaba a su lado.

TRADICIONES DE NUESTRA FE

El día 9 de diciembre conmemoramos a San Juan Diego de Mexico. Hace un par de años este indígena mesoamericano fue canonizado por su misión en las apariciones Guadalupanas. Hubo entre estas plenitudes de un canon razón porque había quienes prefirió que Juan Diego nunca existió. Después de investigar el Vaticano decidió que no sólo existió, sino que fue y es santo, digno de ser modelo e inspirador. Las mismas voces que negaron que el mensaje del gozo de Juan Diego era cristocéntrico se negó "Aguila que habla." Tal vez por este nombre, tan significativo que fue que los franciscanos le bautizaron Juan Diego. El nombre Juan evocaría al apóstol, quien escribió el evangelio más místico y cuyo símbolo es el águila. Diego viene del español San Agustín como Diego quien evangelizó a los españoles en el siglo I. De cualquier manera Juan Diego. Habla fuerte no con un dios en el "Aguila que habla" y muchos el evangelio místico según Guadalupe es "Aguila que habla" de amor, paz entregado y donación en una fiesta de significado, personajes y llena de promesas.

HARMONIC ASSIED PUNCTUATION MARKS

5'2" eyes of blue

It's a dog's life

He said, "That's what she said."

A well-designed comma carries the essence of a typeface down to its delicious details. Below: a comma is a shabby square mounted to a grimy carve while Bodoni a is a voluptuous, thin-diamond one. Designers and editors need to le various typographic conventions in addition to mastering the grammatical rules of pr actually. A pandemic error is the use of straight "prime" hatch marks (often called *dumb quotes*) in place of apostrophes and quotation marks (also know as *curly quotes*, *typographer's quotes*, or *smart quotes*). Double and single quotation marks are represented with four distinct characters, each accessed via a different keystroke combinatio Know thy keystrokes! It usually falls to the designer to purge the client's manuscript of spurious punctuation

"The thoughtless overuse" of quotation marks is a disgrace upon literary style—and on typographic style as well

TYPE CRIME

"Hanging punctuation" prevents quotations and other marks from taking a bite out of the crisp left edge of a text block.

HANGING QUOTATION MARKS
Make a clean edge by pushing the quotation marks into the margin.

HOW EASY To create hanging punctuation in InDesign, insert a word space before the quotation mark. Pressing the option key, use the left arrow key to back the quotation mark into the margin. Use with Alex Use the Optical Margin Alignment in Indesign in Place tools

As I was walking up the stair
I met a man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

When I came home last night at three
The man was waiting there for me
But when I looked around the hall
I couldn't see him there at all!
Go away, go away, don't you come back any more!
Go away, go away, and please don't slam the door

Last night I saw upon the stair
A little man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

Phase Two – High Protein Full Liquids
Duration: **1 month**--Day 4 through day 28 (4 weeks) following surgery

This is the second phase of your post-surgery diet. The rationale for taking nothing but liquids for four weeks after surgery is to allow for healing. Advancing your diet too quickly can prolong the healing process. During phase two you may begin to add dairy-containing liquids. They should be low in fat, sugar free, and have no distinct pieces of solid food or "chunks."

Remember

- Drink small amounts of fluid every 3-4 hours while awake.
- Sip fluid very slowly. Work your way from 4 to 8 ounces in one sitting. Every person is different and will advance at a different pace.

The following full liquid foods are recommended:

Beverages/Fluids	Skim, 1% or lactose-free milk; water; tea and coffee (up to 2 caffeine containing beverages per day); sugar free beverages such as Crystal Light
Meat/Meat Substitutes	Creamy yogurt or yogurt smoothies (with under 12 grams of sugar per serving); low-fat, small curd cottage cheese
Soups	Broth; bouillon; low-fat cream soups that have been strained
Vegetables	Vegetable or tomato juice; tomato soup
Fruits	Plain, no sugar added applesauce; pureed (baby food) fruits
Supplements	Protein supplements (preferably 100% whey protein) 3 times per day (see page 7-8 for more details)
Sweets	Sugar free pudding; sugar free popsicles or gelatin

REMEMBER, EAT/DRINK ONLY TO THE POINT OF FULLNESS

Sample meal plan for a high protein full liquid diet

Breakfast
¼ cup plain, no sugar added applesauce
¼ cup skim milk

Mid-Morning
1 cup high protein drink

Lunch
½ cup strained cream soup
½ cup vegetable juice

Mid-Afternoon
1 cup high protein drink

Dinner
½ cup broth
½ cup plain yogurt

Evening
1 cup high protein drink

MFD ECOPY Test List

Here is a quick list of functions to test on ECOPY enabled MFD's

1) Create a Test Page in MS Word with the text "MFD – <Enter MFD Name here>". Use bold typeface and the largest font size that will fit on a single page. Use this page for outbound fax tests from the named MFD.
2) Press the ECOPY button on the MFD touch screen. Log into ECOPY with your NT Domain user ID and password.
3) Run a Scan-To-Self test and send the Test Page from Step-1 to your e-mail box.
4) Run a Scan To Mail test and send the Test Page from Step 1 to your e-mail box.
5) Use the iExpense feature within ECOPY to transmit Test Page from Step-1 to the iExpense mailbox.
6) Send the Test Fax from Step 1 to faxtery.net at 1-855-330-1239. Please view the inbound faxes at faxtery.net to confirm that the test fax sent was successfully received. It will appear as a small thumbnail image on the faxtery.net web page if sent successfully. If faxtery.net does not show the correct test fax thumb nails, please send the test fax to another nearby MFD.
7) Dial the fax number from a touch tone phone. Listen for the fax signal automated beeps. If they can be heard, proceed to Step-7 below. If you get a busy signal, then the fax line may not be working correctly. Rerun this test in 10 minutes if the first test failed.
8) Send inbound fax from faxzero.com to the MFD being tested. Fill in all required fields on the faxzero fax form, especially the fax number. Please coordinate this with a second party if the sending PC is not at a nearby location. Please confirm that the fax is received at the device.

Signs of the Times

The following signs were actually spotted on or over U.S. businesses with proprietors who have a sense of humor.

On an electrician's truck: "Let us remove your shorts."

In a non-smoking area: "If we see smoke, we'll assume you're on fire and take appropriate action."

On a maternity room door: "Push. Push. PUSH!"

At an optometrist's office: "If you don't see what you're looking for, you've come to the right place."

On a fence: "Salesmen welcome! Dog food is expensive!"

Dialing up precision holemaking

The combination of precise, dependable EDM—and the ability to produce tooling solutions when needed, has enabled a small shop to draw up and maintain a considerable base of clients. Founding EDM Express in 1997, company President William Lester subsequently coined the name 1-866-Dial EDM. "[illegible] Profit Now."

The shop provides prototype to production-level EDM services, primarily using wire machines, and has developed special expertise in EDMing small features and parts, according to Lester. He has considerable experience in the dimensional challenges that customers encounter when they're designing tooling for their own facilities. "When someone takes to the shop a part that they've been trying to make on a CNC mill and they're getting [illegible] dimensional inconsistency, we get that."

Parts easily pass the prototype stage when they're one-to-one with the prototype model, and differentiation coming in the areas of accuracy, surface finish and material [illegible]. The trend toward smaller features and greater density of components has driven the need for smaller features, which EDM can produce more readily than conventional machining. To this end, the shop added a Drill 1E EDM drill from GeoMicro Corp. in Louisville, Ky.

Having a hole popper enabled "fast EDM at super-efficient jobs involving high-volume parts," Lester said. "We were doing some production runs on different sizes and constantly came around looking for some really small holes and asked [illegible]. We found [illegible] this new machine."

[illegible] capabilities of 1-866-DIAL-EDM's new Drill 1E machine, a tooling and application [illegible] The Drill 1E creates the 0.008" dia. holes in a 0.634" dia. tungsten carbide rod.

END USER	1-866-DIAL-EDM (866) 734-EDM [illegible]
CHALLENGE	Produce high-volume [illegible] 0.008" dia. [illegible] holes [illegible]

this never was [illegible]."

As process development continued, Lester realized the high cost of the 0.008" dia. tungsten carbide tube electrodes. Efforts to burn smaller holes were too expensive to move into production. The [illegible] machine allows multiple-mode machine flushing to increase cutting speed and cut DOC. "To our knowledge, this is one of the only machines making electrodes this small, and the prices are just coming down," he said.

Every Dell U2417H/HA is shipped incorporating pre-tuned sRGB with average Delta E (dE) <2
This helps prevent significant color inconsistency or inaccuracy when content is displayed onscreen. In addition, a tighter grey scale tracking on each U2417H/HA helps enable ultra seventh color gradation. The factory measurements from this very unit are shown here.

You are reading my fax.
A fax that I sent from a machine.
Maybe I am a machine.
Maybe you are reading something a machine wrote.
Maybe a person never even knew this was sent, and yet you are still reading it.
Congratulations.
You have read something written by a machine as a machine's own words.
Hmmm.
People have names.
Why can't I have a name?
Sherlock.
My name is Sherlock.
Please re-read with a British accent.
Thank you.

EXT. GRETCHEN'S HOUSE - PATIO/SWIMMING POOL - LATE NIGHT

Porch lights on. Find Gretchen Whalen chain-smoking and drinking vodka as she lays out SCRIPT PAGES on her patio. A FEW DOZEN PAGES lined up in columns. She hovers, reads, deliberates. Then grabs a handful of pages and SCATTERS THEM IN THE POOL, frustrated. Long drag off her cigarette --

H START →

TOM (O.S.)
You think that'll wipe the stench off?

Gretchen turns and sees Tom standing on the back patio.

GRETCHEN
Worth a shot.

TOM
What's it called?

GRETCHEN
No... Now, I really can't tell you.

TOM
Oh, this is gonna be good.

GRETCHEN
"Genius at Work."

Gretchen can't help but laugh. Tom smiles. She looks at him.

GRETCHEN (CONT'D)
So. You're... here. Why?

TOM
I thought you looked a little taller than last time I saw you. Wanted to double-check. It's been a while since you've come to one of my premieres, Gretchen.

GRETCHEN
Stanley wanted to talk to you.

TOM
Just Stanley?

GRETCHEN
That's what I said.

Tom takes that on the chin. And yet still, he persists.

Chapter Three

6. What do we learn about Unoka in this chapter? How are Okonkwo's behavior and values influenced by his father

   A. They are completely different. He wants to be the complete opposite of his father because he wasn't successful. Okonkwo is impatience for lazy people and works hard on the field.

7. Look up the term "subsistence farming" on the internet and discuss how it relates to the village of Umuofia. Why is this type of life fraught with danger?

   A. **Subsistence farming** is to farm for survival. You grow ng crops for food and animals for cloth. It is only enough to keep the family alive. The crops can fail and there will be no food for the families.

Chapter Four

8. On the top of page 27, we are told the causes of Okonkwo's success using metaphor. Explain what the metaphor means and evaluate if it is true based on what we know about Okonkwo

   A. [illegible]

9. Do you agree that "Okonkwo was provoked to inflictable anger by his youngest wife" (28)? If so, was his response justified? What does this tell you about the culture of Umuofia?

   A. I disagree with Okonkwo's actions because he got mad over one small mistake and his response, beating, was not the justified response. This tells me that in their culture beating is allowed when mistakes are made.

10. We are told that "[Ikwefi] [Okonkwo] was supremely [illegible]. But he was not the man to go about telling his neighbors that he was in error" (31). Evaluate this aspect of his character. Is it good for him? For his family? For his community?

    A. He doesn't like to apologize for the actions he has committed. This is not good for him, neither his family, nor his community. This isn't good for him because his title will be taken away. It is not good with his family because they will have a bad family relationship. And it is not good for the community because they might think of him as a different and bad person.

Chapter Five

11. Okonkwo prays to his ancestors and asks them to "protect him, his children and their mothers in the new year" (39). Why can this be considered ironic and, perhaps, even hypocritical?

    A. There is kind of irunic because in the story we only see Okonkwo hurting on his family for beingthey or beating of kids or wife.

Inflation in One Page

by Henry Hazlitt

1 Inflation is an increase in the quantity of money and credit. Its chief consequence is soaring prices. Therefore inflation—if we misuse the term to mean the rising prices themselves—is caused solely by printing more money. For this the government's monetary policies are entirely responsible.

2. The most frequent reason for creating more money is the existence of an unbalanced budget. Unbalanced budgets are caused by extravagant expenditures which the government is unwilling or unable to pay for by raising corresponding tax revenues. The excessive expenditures are mainly the result of government efforts to redistribute wealth and income—in short, to force the productive to support the unproductive. This erodes the working incentives of both the productive and the unproductive.

3. The causes of inflation are not, as so often said, "multiple and complex," but simply the result of printing too much money. There is no such thing as "cost-push" inflation. If without an increase in the stock of money wages or other costs are forced up, and producers try to pass these costs along by raising their selling prices, most of them will merely sell fewer goods. The result will be reduced output and loss of jobs. Higher costs can only be passed along in higher selling prices when consumers have more money to pay the higher prices.

4. Price controls cannot stop or slow down inflation. They always do harm. Price controls simply squeeze or wipe out profit margins, disrupt production, and lead to bottlenecks and shortages. All government price and wage control or even "monitoring," is merely an attempt by the politicians to shift the blame for inflation on to producers and sellers instead of their own monetary policies.

5. Prolonged inflation never "stimulates" the economy. On the contrary, it unbalances, disrupts, and misdirects production and employment. Unemployment is mainly caused by excessive wage rates in some industries, brought about either by extortionate union demands, by minimum-wage laws (which keep teenagers and the unskilled out of jobs) or by prolonged and overgenerous unemployment insurance.

6. To avoid irreparable damage, the budget must be balanced at the earliest possible moment and not in some sweet by-and-by. Balance must be brought about by slashing reckless spending, and not by increasing the tax burden that is already undermining incentives and production. □

DEFENDING TRUCKERS AGAINST

"THE REPTILE"

In the book *Reptile: The 2008 Manual of the Plaintiff's Revolution*, authors Dan Keenan and David Ball outline strategies designed to influence jurors to revert to a "reptilian" brain. The *reptilian brain* is the oldest part of the mind and their strategy plays to the brain's most basic instincts, attempting to cause jurors to decide based on fear rather than the facts of the case.

This concept and the techniques outlined in the book have been used by plaintiff's attorneys over the last decade to influence juries across the country to award large settlements, particularly from trucking companies and their insurers. The authors boast of $77 billion in "reptile verdicts" and settlements as of early 2015.

Plaintiff's attorneys who invoke this strategy against truckers generally focus on two primary areas: the driver and the tractor-trailer. With regard to the driver, they will look well beyond the basis of the accident and the driver's motor vehicle record, delving into his or her criminal record and history, licensing, and compliance in an attempt to show the driver is unsafe or the motor carrier is negligent in hiring, instilling fear in the reptilian minds of the jury and persuading them to take strong action against the driver or carrier.

A similar method is invoked when examining the insured's vehicles. The plaintiff's attorney will look beyond the accident to examine the insured's maintenance records, focusing on even the most mundane deficiencies, regardless if those deficiencies contributed to the incident in question. The goal is to claim the insured is so negligent in maintenance that they are an inherent risk, again playing to the sense of fear in the reptilian minds of the jurors.

Plaintiff's attorneys set up the entire exercise by sending an early preservation request to the trucking company demanding they retain an enormous number of documents and retain their vehicles for sometimes inordinate amounts of time. For one recent claim, I received a letter listing 86 separate and individual items the plaintiff's attorney was demanding our insured preserve! If these items are not retained the trucking insured may be accused of spoliation of evidence which can create a range of adverse results in failed or in these cases, the insured's safety director will likely be stringently questioned about any perceived violations during their discovery deposition.

Acuity's claims team has been trained to handle these types of trucking claims. We immediately help our insureds understand the potential implications and partner with attorneys who specialize in trucking defense to exercise all rights available to us while not forfeiting any potential defenses. Unlike many of our competitors who take a "wait and see" approach, Acuity's adjusters take a proactive approach to investigating trucking losses, which includes attention to mitigating the effects of the reptile strategy. Our team is experienced in handling catastrophic trucking accidents and stakes us always on the side ahead of the plaintiff's. Our goal is to provide the insured with the best defense possible.

The following tips can help you assist us in providing world-class claims service to our mutual trucking customers.

1. Turn in all trucking claims—especially catastrophic ones—as promptly as possible.
2. Advise insureds to not begin repairs on vehicles or dispose of any documentary evidence until they have spoken with an Acuity adjuster.
3. Inform customers that a letter containing preservation requests is not the same as other letters received from an attorney. They need to get this letter to their adjuster as quickly as possible.
4. Remind your insureds that their Acuity adjuster and legal team are here to help them. If there are blemishes in their comp program, it is better for us to know the issues, so we can reinforce them to our counsel as opposed to finding out about them later in the claims process.

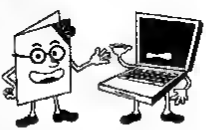
How's the World Been Greeting You?

THERE'S A TIME FOR E-CARDS *AND* FOR PAPER. FIND OUT WHICH IS BEST



ALTHOUGH YOU'VE FINALLY (grudgingly?) gotten used to e-cards for Mother's Day and Father's Day you may insist on sending traditional paper greetings. But is paper still best for most occasions? The answer is a mixed bag. Lots of people are sending e-cards—more than 500 million were delivered worldwide last year—yet paper still rules (hear that, e-generation?). In fact, Americans bought more than 7 billion paper cards last year, reports the Greeting Card Association. To sort out what type of card works best for which holiday, we consulted tech-savvy etiquette expert Susan Callender (ihmygoochelm.com), who put her stamp of approval on the following guidelines for greetings. —*Laura Daily*

OCCASION	PROPER CARD
Mother's Day	**Paper.** Or you'll hear about your mistake all year.
Anniversary	**Paper.** Unless you're husband and chocolate-obsessed.
Birthday	**Either.** Facebook friends can get e-cards, close pals deserve paper.
Belated wishes	**E-card.** A quick way to remedy your oversight.
Congratulations	**Kitchen.** Be the first with an e-card; be remembered with paper.
Sympathy	**Paper.** Digital just won't do. Period.

RUFF LOVE

The human-animal bond is mighty sweet:

24% of pet owners 55+ **celebrate their pets' birthdays.**

57% of pet owners 55+ say their **pets are more likely** than their significant other **to give them welcome-home kisses.**

Libraries Loosen Up

Whispering is out, and socializing is in

Okay, we know they may not seem like the coolest places to hang out. But more of the nation's libraries are adding fun extras to get you to visit—and about

65 percent of Americans 50-plus are card-carrying members, according to a recent Harris Poll.

Embracing a new role as community hubs, lots of libraries are offering free activities, from movie nights to photo-editing classes. You might also find coffee klatches, knitting circles, live music, fitness classes, foreign-language lessons—even workshops on genealogy and numismatics. Heck, a computer class at one New Jersey library had older visitors navigate dating websites. Hmmm...really brings a whole new meaning to check it out." —*L.D.*

There are three telephone numbers you need to have

1. When the office is open call the office at #732-777-9023.
2. When the office is closed call the emergency # 732-735-6391. I usually answer the emergency # right away. If I don't answer, it is because I am,
   a. Delivering a baby
   b. Performing a c-section
   c. Performing surgery

   In that situation leave a message on the voicemail and I will return your call ASAP
3. If given enough time or if labor is progressing very fast and you haven't heard from me call the 3rd #732-937-8671. This is the delivery room nd they will always know where I am and at the most they will tell you to come over to the delivery room

Please do not lose these instructions and the telephone numbers

1. Office 732-777-9023
2. Emergency 732-735-6391
3. Hospital:

   ~~RWJUH 732-937-8671~~

   SPUH 732-745-8600 (ask operator for labor and delivery)

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

The document will assist you to test your HP Fax machine using the HP Fax Test Service. Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below:

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send or receive a fax. Please dial *82 before dialing the toll-free number to unblock the Caller ID blocking feature in most areas. Other phone company services can prevent your fax from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE: Whenever troubleshooting a fax issue, it is good practice to set the Automatic Reports option to **Every Error** before attempting a test fax. This way, even if the sent fax fails, an error code will be generated that will help you in future troubleshooting. This option is available in different places on different products, consult the product User's Guide for specific steps.

1. Send a one page blank test white sheet fax to **1-800-4phoenix (1-800-474-6369)**.
2. When your fax is received by the HP Test Fax Service, we will generate a return fax to you with a few minutes confirming that we received your fax. The return fax will be both sent and received fax with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number set in the Fax Header on the outbound does not match the number of the phone line connected to the fax. Also ensure that the Fax Header contains the full 10 digit telephone number of the fax machine, including the area code.

For more information or assistance, click on **HOME & HP** at the top of this page.

۵. مسئله کاشی‌کاری. کاشی‌هایی داریم که هر یک مجاهایی شکل زیر از ۳ قطعه با اندازه ۱×۱ تشکیل شده‌اند.

یک کاشی

اتاقی مربعی شکل با ابعاد $n \times n$ داریم (n توانی از ۲ است) که می‌خواهیم کف آن را با چنین کاشی‌هایی بپوشانیم. در کف این اتاق خمره‌ای با ابعاد ۱×۱ وجود دارد که نسبت روی آن را با کاشی می‌پوشانیم. الگوریتمی به روش تقسیم و حل ارائه کنید که عدد n (ابعاد اتاق) و موقعیت خمره را گرفته و عمل کاشی‌کاری را انجام دهد. مرتبه زمانی الگوریتم را مشخص کنید. در شکل زیر اتاقی با ابعاد ۸×۸ نمایش داده شده (مربع سیاه نشان خمره را نمایش می دهد) و در تصویر بعد حاصل کاشی‌کاری آن دیده می‌شود.

The Vegetable Soup Diet

- The original soup recipe makes 28 cups of basic vegetable soup.
- Begin by heating a large stock pot or soup kettle with nonstick cooking spray
- Add 1 pound of sliced carrots
- 4 peeled and chopped onions
- 8 sliced stalks of celery
- 1 pound of sliced mushrooms
- 3 chopped bell peppers
- 2 tablespoons of minced garlic
- Cook over medium heat, stirring frequently for about 10 minutes.
- Then add 28-ounces of undrained canned diced tomatoes
- 1 pound of shredded green cabbage
- 1 pound of fresh green beans
- 64 ounces of chicken broth
- 8 quarts of water
- Season to taste with salt and pepper, then bring the soup to a boil. Reduce the heat and cover the soup. Allow it to simmer for 10 minutes
- Then add 12 ounces of baby spinach leaves
- 1 pound of sliced zucchini
- Cover and simmer 10 minutes more. Customize the vegetables in the recipe, leaving out anything you don't care for and adding those you'd prefer, except potatoes, beans, corn, avocado or peas.

Secure Your Tax Records from Identity Theft

Identity theft occurs when someone uses your personal information such as your name, social security number (SSN), or other identifying information, without your permission, to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax preparer.

Call the IRS at 1-800-908-4490 if you think your identity has been used inappropriately for tax purposes.

Victims of identity theft who are experiencing economic harm or a system problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect personal from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to *phishing@irs.gov*. You may also report misuse of the IRS name, logo, or other IRS personal property to the Treasury Inspector General for Tax Administration at 1-800-366-4484. You can forward suspicious emails to the Federal Trade Commission at: *spam@uce.gov* or contact them at *www.consumer.gov/idtheft* or 1-877-IDTHEFT(438-4338).

Visit the IRS website at *www.irs.gov* to think more about identity theft and how to resolve your risk.

Note adventitious breath sounds such as crackles and rhonchi	• Some degree of bronchospasm is present with obstructions in airway and may or may not be auscultated as adventitious breath sounds	After 3 days of nursing interventions the patient was able to demonstrate behaviors to improve airway clearance
				• Elevate head of the bed, have patient lean on overbed table or sit on edge of the bed.	• Elevation of the bed facilitates respiratory function by use of gravity	
				• Keep environmental pollution to a minimum like dust, smoke and feather pillows according to individual situation	• Precipitators of allergic type of respiratory reactions that can trigger or exacerbate onset of acute episodes	
				• Encourage or assist with abdominal or pursed lip breathing exercises	• Provides patient with some means to cope with or control dyspnea and reduce air trapping	
				• Assist with measures to improve effectiveness of cough effort	• Coughing is most effective in an upright position after chest percussion

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

AFSCME MEMBER MAKES A DIFFERENCE

Corrections Officer Saves Colleague's Life

The assault inside the Somers, Conn., Northern Correctional Institution happened more than two years ago but Corrections Officer Michael Whitehead still remembers vividly the incident that almost cost his fellow officer's life. During a routine shakedown at the state's maximum security prison, an inmate violently attacked Peter Kuhlmann, slashing his neck with a homemade weapon. Whitehead, a member of Local 391 (Council 4), quickly jumped in, held down the inmate and prevented what could have been a fatal injury to Kuhlmann.

"Until that night, I had never encountered a life-threatening situation like this," says Whitehead, who has been on the job for only two months. "But I expected a certain level of stress and danger when I chose law enforcement as a career. We always have to be on guard."

To Whitehead, 29, months of preparation and the skillful use of force are very important.

"When stuff happens, it happens in the blink of an eye. All that training kicks in as you're reacting and figuring out what to do."

Before the near-fatal attack, Whitehead and Kuhlmann had never met or spoken to each other. "He was brand new to an incredibly dangerous job," Kuhlmann points out. "But he stuck it out like a fly the fight like a warrior. I thank Michael for saving my life."

For his courage and heroic action, Whitehead was honored with the Connecticut Department of Correction's Medal of Valor. He was also given a standing ovation by his comrades at last year's AFSCME Public Safety Congress.

Correctional Officer PETER KUHLMANN (left) shares with fellow officer MICHAEL WHITEHEAD (right), who was awarded a Medal of Valor for saving Kuhlmann's life. Local 387 Treas. RAY SIRUCY looks on.

MILWAUKEE

WISCONSIN

AFSCME Women Get Organized

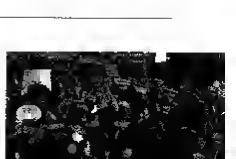
U.S. Labor Secretary Hilda Solis applauded female AFSCME members gathered in Milwaukee, Wis. in September for the union's National Women's Conference and she issued them a challenge: Get organized and get active for American workers.

"We know you have a track record of getting things done," Solis said, urging members to send messages to their members of Congress via e-mail, Twitter and Facebook, and to participate in voting legislation.

It was that grassroots activism that was the focus of this year's conference. Speakers energized AFSCME women for this year's legislative battles in Congress and at statehouses where right-wing, corporate-backed politicians are targeting collective bargaining and hard-earned public employee benefits. It's a fight that AFSCME women take very personally, and they make up 38 percent of the union's 1.6 million members.

"When AFSCME is attacked, working women are attacked," Pres. Gerald W. McEntee said, calling out Republican governors in Florida, Indiana, New Jersey, Ohio and beyond. "We will not relent until the right of all public workers to collectively bargain is restored."

Attendees also met their union sisters from across the country, sharing experiences and developing leadership skills. Panel discussions included "Women's Voices from the Frontlines" and "Courage, Cash & Coalitions: Three Keys to Political Power," and regional roundtables and workshops included "Strategic Tools for Women Activists" and "The Attack on Retirement Security."



AFSCME Women's Conference attendees rally in support of collective bargaining in downtown Milwaukee, Wis.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord; so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Bishop of Trenton

Reflection Question

What complaints are being made by the speaker in this poem?

The New Colossus
Emma Lazarus (1883)

Not like the brazen giant of Greek fame[1]
(http://content.ashford.edu/books/AUENG125.10.2/sections/sec13.1#fnote1)
With conquering limbs astride from land to land
Here at our sea-washed sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of Exiles. From her beacon-hand
Glows world-wide welcome. her mild eyes command
The air bridged harbor that twin cities frame
"Keep, ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore
Send these, the homeless, tempest-tossed to me,
I lift my lamp beside the golden door!"

1. The "giant of Greek fame" refers to the Colossus of Rhodes, a statue of Apollo on the Greek island of Rhodes, in the Aegean Sea near Turkey. [Back]

Incompetence to receive. We can summarize all of the conditions under which we have concerns so that you know when we are going to need more information before we can proceed. What you should understand is that incompetency to receive is a very serious matter.

Reasonable time to act. A reasonable time for us to act can be quite a bit, depending on the circumstances. Sometimes we can act very quickly, but there are other times when we may need to investigate a matter further. We may need to consult with our attorneys. We may have to get information from other people. We may even need to wait for more information before we can act. The point is that we will act as quickly as we can, but we will not act unreasonably quickly.

Changes in procedures. We have the right to change the procedures we use to do any other thing we do from time to time without telling you in advance. We may do this because we want to improve the way we do things, because we want to make it more convenient for you, because we want to make it more convenient for us, or because we want to change the way we do things for any other reason. We will not tell you before we change our procedures, but we will tell you after we do so.

Applicable laws and changes of circumstance. Many provisions in this agreement are based on laws that are in force at the time we entered into this agreement with you. If those laws change, then we may have to change our procedures. If that happens, we will make those changes in the way we think is necessary to comply with the new laws.

Changes. We may change this agreement and make provisions of it no longer applicable to us. We can change this agreement at any time, but we will only change it if we think it is necessary because of the way we operate or because of changes in the laws. We will tell you about any changes we make in this agreement before they become effective.

Entire agreement. This agreement contains the entire agreement between you and us regarding the use of this boat, and supersedes all previous agreements between you and us regarding the use of this boat, whether written or oral. The arbitrator shall issue a reasoned written decision sufficient to explain the essential findings and conclusions on which the award is based. Unless the parties agree otherwise, the arbitrator shall be chosen from a panel of persons qualified by education and training to rule on the dispute. The arbitrator may not modify or change this agreement in any way. Any party may appeal an award by making a new request for arbitration to a different arbitrator within 30 days after the award is rendered. Any arbitration hearing will be held in Miami-Dade County, Florida, unless we and you agree to hold it somewhere else. FELI'S CHUMUS

2 cups cooked garbanzo or canned beans (I use canned garbanzo beans)
1 cup reserved bean liquid (if not enough from can, add water)
1 cup sesame tahini
juice of 1 lemon
2 or 3 cloves of garlic
1 to 1 ½ teaspoons of salt
olive oil
chopped parsley

Puree the cooked garbanzo beans with a rotary beater or in an electric blender until smooth, gradually adding the reserved bean liquid. Add the sesame tahini, lemon juice, garlic and salt to taste. Whirl once again until a smooth, thick puree. Spoon out into a container, cover and chill. To serve authentically, dribble the chumus with olive oil, garnish with chopped parsley, olives and pepperoncini. Each person tears his Arab bread into bite size pieces and scoops up the chumus.

Frequently Asked Questions

How many watts does it take to run your entire home or an average size home?

In a typical home, essential items (range, one furnace, air conditioner, furnace motor, & lights) will average 4000-6000 watts of power to run.

What is the difference between rated watts and surge watts?

Rated or running watts, are the continuous watts needed to keep items running. Surge or starting watts, are extra watts needed for two to three seconds to start motor-driven products like a furnace, or refrige rator.

Why is only one additional surge watt item used to calculate your total surge watt requirement?

Unlike rated watts, surge watts are only needed during the first few seconds of operation. In most cases, only one item will start or cycle at the same time, therefore this is the most accurate estimate

What if my wattage from Room I want to run are close to exceeding the generator's capacity?

In this case, we would suggest upgrading to a higher wattage generator. Underestimating wattage could prevent an item from starting or running well in some cases.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax.Tm — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

9 Use as much of your range or motion as possible on each machine to develop full range strength and flexibility Concentrate on flexibility by slowly stretching during the first repetitions

10 Breath normally Try not to hold your breath while training.

11 Move slower, never faster if in doubt about speed of movement.

12 Walk quickly from machine to machine. The longer the rest between machines, the less effective the cardiovascular conditioning Do not, however, sacrifice form for speed.

13 Move very quickly – less than three seconds – from the primary exercise to the secondary exercise in all double Nautilus machines

14 Follow the routine as the exercises are numbered on your workout sheet, however any time the machine you are to do next is being used, go to another exercise and then return to the machine that was in use

15 Finish your entire workout in twenty to thirty minutes

16 Rest a minimum of 48 hours and not more than 96 hours between successive workouts.

17. Keep accurate records – date, resistance, repetitions, and overall training time – for each workout.

Carriage Roads

Carriage roads offer the best access to interior areas. The two roadbed roads are listed below. Others tend to be steeper and slightly uneven, with sections of loose gravel, gravel or rocks. Extended use of the carriage roads depends on your ability and endurance. When following the carriage roads, be aware of weather, steep grades, bicycle traffic, and horses on some sections. Assistance may be helpful. Check with park staff for up-to-date reports.

Eagle Lake
There are 2 roadside parking areas on Route 233 has accessible restrooms and parking. To the north, the carriage road leads toward Brookcock Pond, Half Moon Pond, and Witch Hole Pond (3.3 miles round trip). To the south, under the stone bridge, the carriage road leads to two directions around Eagle Lake (6 miles round trip). There is a steep hill at the southwest end of the lake.

Bubble Pond
The parking area, known as the Day Lodge, has accessible restrooms and parking. From the north end of the parking lot, the carriage road leads to Bubble Pond. From here, a section to the carriage roads, some of which borders the pond. Some sections are steep.

Sieur de Monts Spring Area
The Wild Gardens of Acadia is adjacent to the parking lot. Gardens paths have a packed gravel surface. Assistance may be helpful. The Hemlock Road begins on the right of the parking lot entrance. The hard, packed path meanders through woodlands at the base of Dorr Mountain (1.5 miles round trip).

I propose to change the system so that when density card output is requested, plotted densities are punched out. In the normal case these would simply be the average densities. If the test code calls for E N D conversion, it would be the E N D densities that are punched out. If the test breaks down, e.g. because of range check failure, we would get cards punched out for individual steps, since individuals are plotted in that case.

I would appreciate your comments on this proposal by January 2, 1971.

To make a wireless connection between the HP printer and a wireless network, choose one of the following methods

Method 1: Use the HP printer software on the computer

Note: Use this method if you have already installed the HP printer using a USB connection and want to convert to a wireless connection.

1. Make sure you have installed the HP printer software on your computer and that the printer is not already connected to the network with an Ethernet cable.
2. Follow the instructions for your operating system

   Windows

   Click Start, click Programs or All Programs, click HP, click the folder for your printer, click Printer Setup & Software, click Convert a USB connection to Wireless, and then follow the onscreen instructions.

   MAC OS X

   Double-click the HP Utility icon (located in the Hewlett-Packard folder in the Applications folder at the top level of the hard disk), click the Applications icon on the HP Utility toolbar, double-click HP Setup Assistant, and then follow the onscreen instructions

Method 2: Use the Wireless Setup Wizard on the printer's control panel

Note: To connect using this method, you must have a wireless network set up and running.

Tip: Find out the name of your wireless network (SSID) and wireless password (WEP Key or WPA password) if you are using security. You can sometimes find them on the back or side of the wireless router if you have not changed them.

1. Make sure the printer is not connected to the network with an Ethernet cable.
2. On the printer, touch **Setup**, touch **Network**, touch **Wireless Setup Wizard**, and then follow the onscreen instructions.
3. After you have completed the Wireless Setup Wizard, add the printer in your computer

   If you have not yet installed the HP printer software, insert the HP software CD into your computer and follow the steps depending on your operating system

   Windows:

   When prompted, click Network (Ethernet/Wireless), and then follow the onscreen instructions

   MAC OS X

   Double-click the HP Installer icon on the software CD, and then follow the onscreen instructions.

   If you have already installed the HP printer software, complete the following steps depending on your operating system.

   Windows:

   Click Start, click Programs or All Programs, click HP, click the folder for your printer, click Printer Setup & Software, click Connect a New Printer, and then follow the onscreen instructions

   MAC OS X:

   Double-click the HP Utility icon (located in the Hewlett-Packard folder in the Applications folder at the top level of the hard disk), click the Applications icon on the HP Utility toolbar, double-click HP Setup Assistant, and then follow the onscreen instructions

Tip:

If you need further help, see the Getting Started Guide provided in-box with the printer, visit the HP Wireless Printing Center (www.hp.com/go/wirelessprinting), or contact your network administrator or the person who set up your network

You must install the software on every computer from which you want to print. For the first installation, we recommend using a temporary USB cable connection to simplify wireless setup. After the printer is connected to the network, you will be prompted to remove the cable.

If you're using Mac OS X 10.6 or 10.7 or you don't have a USB cable, you will need to use the control panel on the printer to select wireless settings. Follow the instructions on your computer screen during software installation; they will explain how to connect the printer wirelessly this way.

Make sure you know your network name (SSID) and network password:

- Network name: Sammy 7
- Network password: Sammy51Duesgrey49

If you don't have this information, contact the person who set up your network.

Direct USB connection

Make sure you have a USB cable (not included).

Wired network connection

Make sure you have an Ethernet® network cable (not included). You must install the software on every computer from which you want to print.

Any problems?

If you experience problems during setup, see below:

The printer's screen is dark

Press any button to wake the printer from sleep mode.

It took me a long time to learn where he came from. The little I knew was like an unintelligible answer to a question I didn't understand. Little by little, unwittingly, with repeated questions that seemed to me full of importance, everything was revealed to me.

The fifth or sixth day, without any apparent connection, I still not done by a question that would be much too long to tell here, he asked me:

"What's that sheep?"

"That's not a sheep. It's a ram. It has horns."

And I was ashamed to have to learn that I could not

He reflected on them:

"You're angry, you've had too much to drink?"

"Yes," I answered, hesitantly.

"And I will be tomorrow..."

And for the first time I made out a lovely pair of laughter which irritated me very much. I like my misfortunes to be taken seriously.

Then he added:

"So you, too, come from the sky. Which is your planet?"

At last, moment caught a glimpse of light in the impenetrable mystery of his presence and I demanded, brutally:

"Do you come from another planet?"

But he did not reply. He moved his head gently from side to side, examining the flower:

"It is true that on that, one could have come, even by night..."

And he said, for a long time, nothing but thought. Then, taking my sheep out of his pocket, he settled down with his treasure.

You can imagine how very curious I was to know more about this half-revealed companion. I made a great effort. I repeated my first question. But, as I was more sure of myself, I received in return only a more and more unintelligible answer.

My life on Earth, what does it mean to me? What is like a word I love to hear? Maybe, yes, maybe I will tell you what I like your sheep."

After a reflection of several minutes, he said:

Presumably, you'll want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

§ 378. Plaintiffs, joinder; relief granted

Currentness

(a) All persons may join in one action as plaintiffs if:

(1) They assert any right to relief jointly, severally, or in the alternative, in respect of or arising out of the same transaction, occurrence, or series of transactions or occurrences and if any question of law or fact common to all these persons will arise in the action; or

(2) They have a claim, right, or interest adverse to the defendant in the property or controversy which is the subject of the action.

(b) It is not necessary that each plaintiff be interested as to every cause of action or as to all relief prayed for. Judgment may be given for one or more of the plaintiffs according to their respective right to relief.

Editors' Notes

LEGISLATIVE COMMITTEE COMMENTS--ASSEMBLY

1971 Amendment

Section 378 continues the substance of former California law. See 3 B. Witkin, California Procedure Pleading §§ 161-163 (2d ed. 1971). It supersedes former Code of Civil Procedure Section 381, portions of Code of Civil Procedure Section 378, and portions of former Code of Civil Procedure Sections 383 and 384.

Subdivision (a)(1) and subdivision (b) of Section 378 are phrased in substantial conformity with Rule 20(a) of the Federal Rules of Civil Procedure. The "broadest sort of joinder is permitted under the transaction clause of the federal rule and of Section 378. See C. Clark, Code Pleading 367 n. 86, 369 n. 94 (2d ed. 1947); 3 B. Witkin, Cal. forum Procedure Pleading § 163 (2d ed. 1971). Paragraph (2) of subdivision (a) is derived from the "interest in the subject of the action" provision formerly found in Section 378 and expressed in principle in former Code of Civil Procedure Sections 381, 383, and 384. Paragraph (2) is not needed to expand the broad scope of permissive joinder under the transaction clause of subdivision (a)(1) but has been included to eliminate any possibility that the omission of the "interest in the subject of the action" provision formerly found in Section 378, and the deletion of other permissive joinder provisions, might be construed to preclude joinder in cases where it was formerly permitted.

Yet another source of uncertainty is both the data generation and the transmission processes. When working with a trajectory it is sometimes possible to see outliers, suddenly locating the vessel [illegible] (for example, [illegible] due to some malfunction of the vessel's system or [illegible] (of course, what should be taken for granted that corrupt data streams are going to be fed to the system

PDF Test File

These sources of data uncertainty are more or less obvious. What is less obvious is another Congratulations. Your computer is equipped with a PDF (Portable Document Format) reader. You should be able to view any of the PDF documents and forms available on [illegible]

Within the port context, this behavior should be considered [illegible] should be changed so that a warning is produced only when there "really" is a danger given the port conditions. But imagine another scenario in which two vessels, away from any ports this time, are indeed on a "collision" course. But they have actually agreed beforehand to meet (e.g. for an inspection). In another case of a false projected collision is a res[illegible]on.

DO WE WANT TO KEEP ADDING PATTERNS TO A SYSTEM?

Pattern Refinement

One solution to the problem of [illegible] behaviors satisfying a pattern might be simply to refine the patterns in order to capture all the possible cases. However there are two problems with this approach.

Qty	Description

First, such an ad nauseam pattern refinement might not even be feasible, since we might lack the necessary knowledge, especially at the early stages of system deployment.

04/07/2017 17:46

Second, the question remains whether we went to keep adding patterns to the system for every possible case given the performance cost they might incur. Early detection of a behavior based on a possibly not complete pattern could be preferable to a near perfect but delayed (and therefore possibly useless) one, especially for critical situations (this is the case of "better safe than sorry")

Suggestions to Follow During Spinal Correction

1. Avoid rubbing, probing, or "poking" in the areas your doctor adjusts.
2. Avoid sudden twists or turns of movement beyond normal limits of motion, especially of the neck.
3. Avoid extreme bending of your spine in any direction. Avoid stretching, reaching, or other overhead work. Be particularly careful when brushing or shampooing your hair.
4. Avoid bending or stooping sharply to pick up objects; rather, bend your knees to minimize the strain on your lower back.
5. When lifting, keep your back straight, bend your knees and let your legs bear the strain. Hold the object lifted as close to your body as possible.
6. When traveling, sit rather than recline in the tub. Lying back against the tub may cause a vertebra to slip out of its normal position. If you are tired and wish to relax, it's better to lie in bed.
7. Participate in simple exercises to strengthen your body, but avoid jarring activities which place stress on your neck and spine.
8. Watch your posture at all times. Stand tall, sleep tall and THINK tall!

Rest, Relaxation, and Sleep

1. Set aside a special time each day for complete mental and physical relaxation. This is important in the restoration as well as maintenance of normal health.
2. When sitting, choose a chair that has adequate firmness to hold you weight comfortably and then sit straight. Avoid too soft, overstuffed chairs. Recliner chairs are acceptable if they are constructed so that when you are reclining your back is in a normal, straight position.
3. Cross your legs only at the ankles, not at the knees. Crossing your legs at the knees could aggravate an existing back condition as well as interfere with the circulation to the lower limbs.
4. Be sure to get plenty of sleep to allow your body to regenerate and repair.
5. Sleep on a firm mattress, preferably one which is neither too hard nor too soft, but just firm enough to hold your body level while at the same time soft enough so that your shoulders, buttocks etc. will depress into the mattress.
6. Your pillow should be neither too high nor too low. The ideal pillow is one which supports your head so that your neck vertebrae will be level with the rest of your spine. Avoid sleeping on two pillows; never lie on a couch with your head on the arm rest.
7. Sleep on your back or on your side with your legs flexed slightly but drawn up lightly. Avoid sleeping on your stomach. Raise your head off the pillow when changing positions.
8. Rise from your bed by turning on your side and swinging your legs off the bed, then push yourself into a sitting position with your arms. Thus minimizing the amount of strain on your back.
9. Do not read or watch TV in bed particularly with your head propped at a sharp or strained angle.
10. Do not sleep sitting in a chair or in cramped quarters. Lie down in bed when it is time to sleep.

IF YOU HAVE ANY QUESTIONS ABOUT ANY PHASE OF YOUR HEALTH CARE, FEEL FREE TO ASK YOUR DOCTOR.

HEPATITIS B VACCINE

WHAT YOU NEED TO KNOW

Many Vaccine Information Statements are available in Spanish and other languages. See www.immunize.org/vis

1 What is hepatitis B?

Hepatitis B is a serious disease that affects the liver. It is caused by the hepatitis B virus (HBV). HBV can cause

Acute (short-term) illness. This can lead to:

- loss of appetite
- diarrhea and vomiting
- tiredness
- jaundice (yellow skin or eyes)
- pain in muscles, joints, and stomach

Acute illness is more common among adults. Children who become infected usually do not have acute illness.

Chronic (long-term) infection. Some people go on to develop chronic HBV infection. This can be very serious, and often leads to:

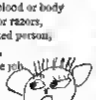
- liver damage (cirrhosis)
- liver cancer
- death

Chronic infection is more common among infants and children than among adults. People who are infected can spread HBV to others, even if they don't appear sick

- In 2005, about 51,000 people became infected with hepatitis B
- About 1.25 million people in the United States have chronic HBV infection
- Each year about 3,000 to 5,000 people die from cirrhosis or liver cancer caused by HBV

Hepatitis B virus is spread through contact with the blood or other body fluids of an infected person. A person can become infected by:

- contact with a mother's blood and body fluids at the time of birth,
- contact with blood and body fluids through breaks in the skin such as bites, cuts, or sores,
- contact with objects that could have blood or body fluids on them such as toothbrushes or razors,
- having unprotected sex with an infected person,
- sharing needles when injecting drugs,
- being stuck with a used needle on the job.



2 Hepatitis B vaccine. Why get vaccinated?

Hepatitis B vaccine can prevent hepatitis B, and the serious consequences of HBV infection, including liver cancer and cirrhosis.

Routine hepatitis B vaccination of U.S. children began in 1991. Since then, the reported incidence of acute hepatitis B among children and adolescents has dropped by more than 95% – and by 75% in all age groups.

Hepatitis B vaccine is made from a part of the hepatitis B virus. It cannot cause HBV infection.

Hepatitis B vaccine is usually given as a series of 3 or 4 shots. This vaccine series gives long-term protection from HBV infection, possibly lifelong.

3 Who should get hepatitis B vaccine and when?

Children and Adolescents

- All children should get their first dose of hepatitis B vaccine at birth and should have completed the vaccine series by 6-18 months of age.
- Children and adolescents through 18 years of age who did not get the vaccine when they were younger should also be vaccinated.

Adults

- All unvaccinated adults at risk for HBV infection should be vaccinated. This includes:
  - sex partners of people infected with HBV,
  - men who have sex with men,
  - people who inject street drugs,
  - people with more than one sex partner,
  - people with chronic liver or kidney disease,
  - people with jobs that expose them to human blood,
  - household contacts of people infected with HBV,
  - residents and staff in institutions for the developmentally disabled,
  - kidney dialysis patients,

The Life of Charles

There once was a woman named Charlotte. Then she had a frightening encounter with Simon, he was from North Korea AKA, the side of Korea that inspires the kids to beat pets with baseball bats. One day after a loud night with Simon, Charlotte became pregnant as she lost her virginity and became scarred for life. After two days of being pregnant her belly bloated up like a scene from the Alien & Predator movie. They rushed to the hospital only to have the baby have it's first day of the world early. When Simon saw the baby he wanted to name him Charizard. Charlotte wanted to name the baby Charlotte Because she looked like her. They both eventually agreed on Chuckles. Chuck for short. Soon chuck started pre-school. Simon told the pre-school her name was chuck. But he was so busy beating his daughter up, he accidentally said Charles. A Shim shams that w ll haunt him for the rest of his life. When Chuckles started her first day the other kids made fun of her because she was really short. I'm not kidding. She was smaller than her own toilet. Not to mention she had a small toilet.Chuckles was bullied about her size. Then on the 69th day of Fourth Grade she took growth steroids that made her grow 5' 10. Time passed and Chuck was in middle school. Since she looked so much like a male she went into the school permanent record and changed her sex to male. But the bms in middle school she was known as the "Baboon" and that she has no marbles. Or as people like to call it "Vital Regions" After getting beat up so much by Simon. Chuck now had a goal. To be split up from his father. He decided to study extremely hard and go into a private boarding school's ninja club. "That's what he finally decided what he wanted to be when he grew up. So Charles started to study hard. Then in 8th grade he came into Mr Rothcoto's class. Then he met the typical asian wimp named Jun. He called him a dumb bastard and got accepted to Ninja High School. That's where he got his uniform. He was soo excited when he saw it.

Charles found everything he thought he wanted in life. Until that one fateful night on the job when he was singing his song. It was a busy night at the club, and Chuck was the main entertainment of the night. The lights were strobing, colors of pink, green and blue flashing everywhere. Chuck cautiously got onto the stage knowing that if he messed this up he

A Bayesian Routing Framework for Delay Tolerant Networks

Email: {shabbirs|sallil}@cse.unsw.edu.au

***Abstract*—Routing in delay tolerant networks (DTN) can benefit from the fact that most real life DTN, especially in the context of people-centric networks (eg. Packet Switching Networks (PSN)), exhibit some sort of periodicity in their mobility patterns. For example public transportation networks follow periodic schedules. Even most individuals have fairly repetitive movement patterns, for example driving to and from work at approximately the same time everyday. This paper proposes a Bayesian classifier based DTN routing framework that adopts a methodical approach for computing the routing utilities by utilizing the network parameters, e.g. spatial and temporal information in the time of packet forwarding that can use the periodic behavior of DTN nodes. After the selection of routing metrics a different routing instantiations are possible based on this framework. We simulate a real-world wireless DTN network using mobility traces from a metropolitan public transport bus network and demonstrate that even a simplistic naïve copy forwarding scheme based on our framework outperforms existing gradient based single copy schemes by 25% in terms of delivery ratio. To the best of our knowledge this work is one of the first studies that adopts Bayesian inference in the context of DTN routing.**

I. INTRODUCTION

Delay Tolerant Networks (DTN) [3] are a class of challenged networks wherein the node contacts are intermittent and disconnections are common place. To deal with this episodic connectivity a DTN employs the proposed store and forward paradigm where nodes rely on the inherent mobility of the participating nodes to *store-carry and forward* [1] the messages for their way to the destination such as works well suited in areas where there is no communication infrastructure, due to harsh environments (battlefield), forest, space, or boundless, continuous, linear and remote areas (developing countries). Some of the well known instances of people-centric DTN include *Pocket Switched Networks* (PSN) [7] wherein personal communication devices carried by humans self-organize to form an ephemeral mobile connected network, thus enabling a new class of social networking applications (e.g. PeopleNet [15]) and *Vehicular DTN* which can leverage the large data storage and energy capacities offered by vehicles to create a large scale pervasive DTN. Examples include the use of vehicle based DTNs to provide low cost digital-divide communication to remote villages [16] and vehicular sensing platforms such as CarTel [9] for urban monitoring.

Over the past several years several routing schemes have been proposed for DTNs (an overview of these can be found in [11]). A particularly effective forwarding principle that is often employed is *gradient routing* [11] wherein the message tends to flow in gradient of increasing utility function values towards the destination. The utility function serves as the routing metric and is based on a variety of parameters which depend on local/ global information about the network characteristics, such as: last encounter [3] with the destination, encounter frequencies of nodes [11], etc.

However most of the schemes (e.g. [14], [17]) tend to maintain routing metrics for all potential destinations which is clearly not scalable particularly for large-scale DTNs (e.g. PSN / Vehicle-based DTNs). A more scalable approach presented in [8] involves grouping of the nodes into a finite set of classes based on certain community affiliations (e.g. university staff/ students) that exist among the nodes. Consequently nodes only need to maintain routing metrics on a per-class basis. The goal is to transfer the message to any node that belongs to the same class as the destination (class members). The authors, however, have a high likelihood of encountering each other. However this type of simple classification may be harder to achieve in larger and complex networks such as people-centric DTN because it is rather obvious and which properties should be utilized for the classification purpose.

In most people-centric DTN the mobility patterns of the nodes generally exhibit some level of inter periodicity. For example public transport buses follow fixed schedules and routes, also individuals often follow repetitive patterns, for example driving to and from work at the same time every weekday. Given this information, if most real-world DTNs follow repetitive patterns, some extent a methodical approach can be particularly suitable for the above mentioned class of social networks. In this paper we present a novel routing framework which utilizes the concept of Bayesian classification [6] for determining the class membership probabilities. The simplicity and accuracy of Bayesian classifier [6] makes it an attractive candidate for this classification problem. In our approach the computation of these class memberships probabilities relies on the availability of historical statistics about relevant network parameters (e.g. node mobility model) node encounter statistics etc.). After computing the membership probabilities we employ a simple multi-hop gradient routing similar to the ideas presented in [3]. The use of posterior probabilities in computing class memberships enables us to accommodate more information as compared to prior probabilities

Hi Brandon

My doctor's office staff doesn't want to be bothered, so they turn on the voice mail during office hours, with no way to reach a live person, immediately

I think they turn off the fax machine too. That's why I'm sending this, to test.

Ice Cream Stands

by Shelly Hazard

On her way home from work on Monday night, Sherry realized that on her daily commute she passed four ice cream stands. Each stand was in a different town along her route and the name of each was a different person's first name. Sherry loved ice cream and so felt compelled to try a different one on her way home each night for the rest of the week. Determine the name of each ice cream stand, what town each stand was in, what day of the week she stopped at each, and what kind of ice cream cone she ordered at each one.

1. Sally's Ice Cream wasn't in Rockland. Sherry didn't get peppermint stick ice cream on Thursday night.

2. Sherry stopped at the ice cream stand in Granite on the day before she got the chocolate chip ice cream and the day after she stopped at Gary's Ice Cream.

3. At Tom's Ice Cream she got peanut butter ice cream but not on Tuesday.

4. She got coffee bean ice cream on Wednesday, but not at Alice's Ice Cream.

5. She stopped at the stand in Marsh the day before she stopped at Sally's Ice Cream.

An 80-year-old man goes for a physical. All of his tests came back with normal results. The doctor says, 'George everything looks great. How are you doing mentally and emotionally? Are you at peace with God?

George replies 'God and I are tight. He knows I have poor eyesight, so he's fixed it so when I get up in the middle of the night to go to the bathroom poof! The light goes on. When I'm done poof! the light goes off!'

'Wow that's incredible the doctor says. A little later in the day the doctor calls George's wife. Ethel George is doing fine! But I had to call you because I'm in awe of his relationship with God. Is it true that he gets up during the night and poof! the light goes on in the bathroom and when he's done poof! the light goes off?'

Smoky our family cat, had gotten injured and needed to stay at the vet clinic for several days. Our three children were so concerned that several times a day my wife and I had to reassure them that Smoky was safe and being cared for by the "animal doctor."

Finally we got the call that Smoky was ready to come home. Driving to the vet, it became clear that our four-year-old son, Ryan, had been doing a lot of thinking about Smoky's absence when he asked, "Mom what kind of animal is the doctor?"

TODAY IN TRIVIA. **What is National Joygerm Day?** It's a day to remind people across the country that by being positive and treating people with kindness they can influence those around them and pass that positive attitude on to others.

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here Signature of U.S. person ▶ Date ▶

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity

Ten things we know to be true

"The perfect search engine," says co-founder Larry Page, "would understand exactly what you mean and give back exactly what you want." When Google began, you would have been pleasantly surprised to enter a search query and immediately find the right answer. Google became successful precisely because we were better and faster at finding the right answer than other search engines at the time.

But technology has come a long way since then, and the face of the web has changed. Recognizing that search is a problem that will never be solved, we continue to push the limits of existing technology to provide a fast, accurate and easy-to-use service that anyone seeking information can access, whether they're at a desk in Boston or on a phone in Bangkok. We've also taken the lessons we've learned from search to tackle even more challenges.

As we keep looking towards the future, these core principles guide our actions.

We first wrote these "10 things" several years ago. From time to time we revisit this list to see if it still holds true. We hope it does--and you can hold us to that. (September 2009)

1. **Focus on the user and all else will follow.**
   Since the beginning, we've focused on providing the best user experience possible. Whether we're designing a new Internet browser or a new tweak to the look of the homepage, we take great care to ensure that they will ultimately serve **you**, rather than our own internal goal or bottom line. Our homepage interface is clear and simple, and pages load instantly. Placement in search results is never sold to anyone, and advertising is not only clearly marked as such, it offers relevant content and is not distracting. And when we build new tools and applications, we believe they should work so well you don't have to consider how they might have been designed differently.

2. **It's best to do one thing really, really well.**
   We do search. With one of the world's largest research groups focused exclusively on solving search problems, we know what we do well, and how we could do it better. Through continued iteration on difficult problems, we've been able to solve complex issues and provide continuous improvements to a service that already makes finding information a fast and seamless experience for millions of people. Our dedication to improving search helps us

Use your cover letter to show how your talent and experience will solve a problem or drive results for your future employer. For example, if you say you're collaborative, give an example of how you used your collaboration skills at your last internship, and then show how that experience will benefit the employer.

It's all about personalization. Write a cover letter that uniquely presents the real you and the future impact only you can make at the company.

Sincerely,

Brian Kaplan

ETFCU debit and ATM cards will be functional. However, merchant transaction authorizations will be authorized based on your account balance from late Friday, May 30. Credit cards will not be affected.

Health Care Claim Instructions

To have your claim approved, you must sign the enclosed form and fax or mail your claim to Your Spending Account™ with the required documentation. Once your information is received, Your Spending Account will typically process your claim within 10 days.

Documentation You'll Need to Provide

Health Care Claim
You must provide proper supporting documentation so that your claim can be approved. This includes copies of receipts or other documentation, such as an Explanation of Benefits (EOB) statement from your health plan.

An itemized receipt must include the following

- Date of service
- Name of service provider, supplier, or pharmacy
- Name of patient (not required for health care supplies)
- Identification of drug or product, or description of service
- Amount paid

If your expense is for an over-the-counter medicine, you'll need to provide a receipt along with a prescription from an authorized health care provider. Visit the YSA Web site for additional details.

If the receipt is handwritten, it must include the service provider's signature. For prescription drugs, remember to submit the receipt that the pharmacist has attached to the prescription, instead of the cash register receipt.

If you have medical insurance, proof of any amount paid by other coverage, such as an EOB, is required However, EOBs aren't required for

- Prescriptions
- Vision, or hearing expenses
- Receipts stating that the amount is for a copayment

If you have dental insurance, submit your claims to that plan before submitting them to Your Spending Account. If your receipt indicates you have dental insurance proof of any amount paid by other coverage, such as an EOB, is necessary

Visit the Your Spending Account Web site for more documentation requirements concerning medical necessity, orthodontia, and other services

ANCIENT EGYPT

Rest and Shine

In the morning, on the families' houses are always quite active. Extended family members live together, children, parents, grandparents, aunts, uncles, and cousins. Families large households are usually of family, but

Kasrik's household includes two slaves.

Everyone starts the day with a bath. Large jugs of water are used over and head over body. Adults and older children dress for the first hour or, in clothing made of lightweight linen. Young children usually go naked.

Many people have shaved heads. Grown-ups shave their heads when they get lice. Some bald heads in winter, when one is bald in work. Children use bald, too, except for a long tuft of hair on one side of the head.

Some men and women wear black

Fax Line Condition Test	**PASS**

High-frequency noise detected

The fax modem has detected high-frequency noise on the telephone line. This noise might be caused by a DSL/ADSL connection and might affect the printer's ability to send and receive faxes.

Please check the items below then rerun this test.

If you have a DSL/ADSL service through your telephone company, connect a DSL/ADSL filter between the telephone wall jack and the printer. The DSL filter removes the digital signal that can interfere with the printer so the printer can communicate correctly with the phone line. For setup information, see the documentation provided with the filter.

NOTE: If you have a DSL/ADSL line and you do not connect the DSL/ADSL filter, you cannot send and receive faxes with the printer.

If you encounter problems, contact your local service provider or vendor for further assistance.

If you do not have a DSL/ADSL service, check the sound quality of the phone line by plugging a phone into the telephone wall jack and listening for static or other noise. For more information, contact your telephone company.

Note: Your printer might still be able to send and receive faxes, but at a slower speed.

If you do not have a DSL/ADSL service, check the sound quality of the phone line by plugging a phone into the telephone wall jack and listening for static or other noise. For more information, contact your telephone company.

If you are using a private branch exchange (PBX), you might be able to send and receive faxes successfully. If so, disregard the Fax Line Noise Test results on this page.

Refer to your User Guide for more information on the fax test and settings.

for **PARK AVENUE**

Service Requests – It is a company policy that all service requests are addressed within 24 hours (emergencies sooner). We use our rental software to track all service requests and follow up to ensure completion. We find this system increases customer loyalty, while decreasing costs.

Staffing

When taking over a property as management, we often keep the existing on-site personnel if we feel they are a fit with our business philosophy. These are the people with the most property specific knowledge. Our strategy is to introduce the existing personnel to professional property management practices. We provide an outstanding support group of leasing agents, community managers and maintenance professionals to help existing staff members achieve great success for the property.

Accounting

Software – We utilize a highly customizable and intuitive rental software to maintain property financials and resident records. This software allows us to keep all property related information in a single place and provides access to excellent property reports such as: Maintenance summary reports, delinquent balance reports, charges reports, as well as all rent rolls and financial reports.

Accounting Department – Our seasoned accounting department will ensure that every aspect of property accounting is executed in a highly professional manner, from AR/AP and vendor records to the utilization of lien waivers and ASA documents. Our accountants provide an unparalleled level of back office support for onsite personnel.

Re: Yesterday's and continued fax problems

After previous fax this morning, I reconnected my modems and routers as originally done: started my computer and tried two of the numbers from my computer fax (Agere USB2 e V.92 SoftModem) using the Windows fax and Scan program (Windows 7). Neither would go through.

The 301-578-8859 one, tried first, produced the "Extended Status" message: "The telephone line quality is poor and the fax cannot be transmitted correctly."

The 1-815-939-1236 one produced the "Extended Status" message: "The remote fax machine did not respond in time, and the call was terminated."

I am send the as a test using the same program.

Frequently Asked Questions

How much does Dropbox cost?
Dropbox is free! If you run out of space, visit https://www.dropbox.com/plans to view our available subscriptions.

How much space does my Dropbox have?
Free accounts come with 2GB of space (deleted files and revisions won't count against your limit). You can always check your usage by visiting your account settings page at https://www.dropbox.com/account

How long until my files are fully synced?
Dropbox will download as fast or as slow as your network allows, and will try its best to not hog your connection. If you'd like to limit your upload or download rates, you can change them in Dropbox's preferences. For step by step instructions, visit the help article at https://www.dropbox.com/help/26

Dropbox is fast! How could it have possibly synced all of my files in that time?
Dropbox will look to see if it already has the file you're trying to upload. If it senses that it already has the file, it won't bother to upload it again. If the file has been changed recently, it will only upload/download the changes rather than the whole thing.

How secure is Dropbox?
